Weekly Report

Benji Euvrard

Week 12 19 March 2009

Summary of activities since last meeting

Last meeting: 12 March 2009

Next meeting: 19 March 2009

Goals and Work targets

Goals for this week

- Research on HDR images: more on display
- Learn to use Lyx software
- Create project website and put it up (if resource available)

Goals Achieved

- Learnt to use Lyx software (the basics)
- Created project website (skeleton)
- Put website up (in correct folder but no link to it from Portal)
- Learnt how to create an HDR image
- Created an HDR image

Proposed goals for next week

- Create some more HDR images
- Well known places better for comparison between real life and print quality
- Get normal prints of HDR images
- Study prints
- Design prototype lighting box
- Continue research on backlighting techniques

Rate your work performance

I didn't work all that well this last week and didn't achieve all goals from the previous week. However, it was a more productive week for course work as well as in areas of project work that were not goals for this week. I'd probably give myself 6 out of 10 for this week and will try to improve next week's score by doing more reading.

Tasks/Learning

The most interesting thing from this week was definitely learning how to make an HDR image. It was so good to see how it 's done and have an HDR image that I made, of something that I know (my little cottage).

Research

As I said earlier - this is one of the bad points of the last week, with little research of papers happening this week. But in creating my HDR image I was able to research this side HDR images, even though I was using tutorial web pages, not journal articles.
