Weekly Report

Samuel Hunter

Week 17, 10 August 2010

Summary of activities since last meeting

Activities
-Gave project presentation
-Played with flash and spinning globes
http://www.masterev.com/flash-spinning-globe-world-tutorial/14/
-fixed dashboard code that made apache crash
-Documented metrics for 9 graphs (3 protocol, 3 traffic rate, 3 top N)
-Layed out project poster
-did some project development writing

Goals and Work targets

Goals for this week

- Project Poster

- Write up user testing document

- no development this week, need a break from coding and too much course work

- Update website

Goals Achieved

- fixed dashboard code that caused it to crash

Proposed goals for next week

- Implement gauges container into rest of dashboard

- More write up

Rate your work performance

How did you feel you worked ?

Not great, I got some project work done, but not much from my set out goals for the week

Did you achieve all your goals ? if not why not?

I discovered other bits of my project that needed to be done before I could get to my goals for last week, and then decided to take a break from coding

and rather do some writing, going home for the weekend did not help productivity either.

What were the issues you had trouble with?

Lots of course work last week and right now, but things will clear up soon.

What assistance did you need to continue?

Nothing really

How can you improve your performance?

Taking only 6 course modules

Provide a rating out of 10 in addition to the above.

6

Tasks/Learning

Research

Read up on usertesting, aparently if I use 3 test subjects I can find 10 usability mistakes, which will be optimal for the effort and time required, now to find guinea pigs
