

# Weekly Report

Samuel Hunter

Week 19, 16 August 2010

## Summary of activities since last meeting

### Activities

- I wrote an introduction and some of my design section, the introduction might need some refactoring though, but atleast its words down and its always easier to come back and edit it later.
- I learned refreshed my database skills and learned how to use a new .NET framework.
- Posted an update on my website

## Goals and Work targets

### Goals for this week

- Complete thesis introduction and conclusion
- Finish project poster
- Update Website

### Goals Achieved

- Introduction done
- Updated website
- finished a draft poster

### Proposed goals for next week

- Start development again and fix and refactor all minor problems that are left so that next week I can implement and finish the main tasks, remaining in the dashboard.

## Rate your work performance

How did you feel you worked ?

Not well at all, I've been struggling to balance course work and project work these last 2-3 weeks.

Did you achieve all your goals ? if not why not?

Not completely and not on time, besides pracs that I had due last week and time used on a attempted poster, the interview with openbox also consumed allot of my time.

What were the issues you had trouble with?

Time, writing the conclusion was a bit tricky and I realised once I've written the other sections it would probably be allot easier.

What assistance did you need to continue?

An extension, flesh out more of my thesis before I write the conclusion

How can you improve your performance?

Course work is finished (except for pracs that are due this week) and no more interviews left.

Provide a rating out of 10 in addition to the above.

6.0

## Tasks/Learning

What is the most useful/interesting thing you learned or did this week?

- I learned how to use the ASP .net MVC2 framework, which was quite interesting
- I also learned how database indexing works and can improve/slow down performance.
