

Weekly Report

Student: Christopher Schwagele

Week Number 5 on 15 March 2010

Summary of activities since last meeting

Porting over InetVis.

Last meeting: 15 March 2010

Next meeting: 23 March 2010

Goals and Work targets

Goals for this week

- Finish cube class port as close as possible
- Mock up of the graphical overlay
- Security metrics?

Goals Achieved

- Cube class port on pause - becoming too dependant on other parts of the program so porting of other classes has begun
- Mock up - played around with some layouts but nothing hard to present yet. Focusing more on the port.
- Security metrics - Got a book from the library

Proposed goals for next week

- Continue with port

Rate your work performance

- How did you feel you worked ? Average
- Did you achieve all your goals ? Not quite
- What were the issues you had trouble with? Interdependencies
- How can you improve your performance? Plan out the process a bit better
- Provide a rating out of 10 in addition to the above. 7

Tasks/Learning

- What is the most useful/interesting thing you learned or did this week?
ATi Stream is better than NVIDIA's CUDA
- Even bad weeks usually yield something positive

Research

- What is the most useful/interesting paper you read this week? N/A
- List what you have been doing research wise - papers read/written/resources found
 - ATi Stream documentation and reviews
- Research should be ongoing.
